

Caverion signed a EUR 19 million contract with Deutsche Bahn in Germany

Caverion Corporation Investor News April 12, 2016 at 10 a.m. EEST

Caverion signed a EUR 19 million contract with Deutsche Bahn in Germany

Caverion has signed a new Large Project and Technical Maintenance agreement with one of the world's leading passenger and logistics companies Deutsche Bahn AG. Caverion will provide building systems and Technical Maintenance for a new maintenance center for trains in Cologne, Germany. The order has a volume of approximately EUR 19 million.

Caverion's delivery covers Project Execution for the following technical disciplines: Heating and Sanitation, Ventilation and Air Conditioning, Cooling and Automation. After completion in May 2017, Caverion will take care of the Technical Maintenance of the 230,000 m² area.

"This project is demanding and requires very reliable and exact planning due to the very short project period and the huge size of the construction site. Clients benefit from our experience and know-how in dealing with such complex and challenging tasks," says **Werner Kühn**, Executive Vice President and CEO, Caverion Germany.

Caverion has cooperated already several times with Deutsche Bahn AG in the past, for example at the Munich railway station and for the construction of the Intercity Express (ICE) hangar in Dortmund.

Deutsche Bahn AG has one of the biggest real estate portfolios in Germany. The company belongs to Caverion's real estate investors client segment.
